

Unmatched Expertise in Developing Custom Geotab Data Integrations

Purpose-built Fleet Management Solutions

As your business and fleet operations continuously evolve, so do your telematics requirements. Geotab's flexible telematics platform offers unlimited possibilities to create enhanced reports, custom integrations and new fleet management applications. With Assured Telematics, our industry leading and dedicated custom development team is ready to provide the solutions you need, when you need them - entirely purpose-built to your exact fleet needs.

It has been eye opening working with Assured Telematics. There are so many custom reports and integrations that they already have. Nine times out of ten, it's either fairly close or needs to be tweaked a little bit. The custom development can be done in a matter of minutes and you're good to go. The entire team is always ready to do anything that is needed... it's top notch.

Unparalleled Engineering

Discovering the optimal solution requires close collaboration. Our experienced telematics engineers will engage in thorough consultations with your team to identify any existing challenges and provide the best solution. By gaining a deep understanding of your business, our engineers will address your specific fleet requirements.

Comprehensive & Flexible Telematics Options

Whether you require a custom API, a direct connector to Power BI, an SFTP server, or even just a scheduled email and attachment, Assured Telematics provides an extensive range of highly flexible and unlimited options. We ensure that every aspect of your needs is met - leaving no detail overlooked.

Customized Service Levels

Our priority is to deliver the optimal outcome while optimizing efficiency and resource allocation. During the consultation process, Assured Telematics will thoroughly assess the impact of your project and collaborate with you to define the most suitable service level you'll need. We understand that not every solution requires backups or multi-region servers, for example.

Clear & Transparent Pricing

Make informed decisions. After an in-depth consultation, Assured Telematics will provide a detailed breakdown of the cost structure for your review. Our transparent pricing ensures you're fully informed and confident in your investment that's aimed to achieve significant fleet cost savings.
